### DETAILED ACTION

1. Receipt is acknowledged of the Amendment filed 02/21/2004.

#### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 59-77 are rejected under 35 U.S.C. 102(e) as being anticipated by Stam (US 2003/0107323).
4. Re claims 58-59 and 68-69: Stam discloses a vehicle headlight illumination apparatus and a method of producing concurrent higher intensity illumination sectors where no vehicles are present and at least one lower intensity illumination sector where a first sensed vehicle is present comprising the steps of providing a vehicular headlight system adapted to direct at least two distinct illumination intensities toward each of a plurality of individually controlled illumination sectors, providing a vehicle sensor (paragraph 0089) for sensing where said first sensed vehicle is present, providing at least one controlled light modulator (paragraph 0087) within said vehicular headlight system providing a controller (44 in Fig. 1A) which uses input from said vehicle sensor to control said at least one controlled light modulator within said vehicular headlight system whereby said controller causes said at least one controlled light modulator to direct a lower intensity illumination toward a sector where said first sensed vehicle's presence is sensed and whereby said vehicular headlight system concurrently directs higher intensity

illumination toward at least one sector to the right side of said sensed vehicle and directs higher intensity illumination toward at least one sector of to the left side of said sensed vehicle (Paragraph 0087).

5. Re claim 60-64 and 70-74: Stam discloses an individually controlled modulator such as a LED array.

6. Re claim 65 and 75: Stam discloses illumination filter elements (Paragraph 0078).

7. Re claim 66-67 and 76-77: Stam discloses illumination steering elements (Paragraph 0083).

#### ***Response to Arguments***

8. Applicant's arguments with respect to claims 58-77 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Conclusion***

1. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2875

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
